

AWARENESS MONTH  
**TESTICULAR CANCER**  
APRIL

**Wear your SCBA!**

Read the Lavender Ribbon Report

Although it is uncommon, affecting 1 in 250 men, testicular cancer is one of the most frequently diagnosed cancers in men 14 to 44 years of age. However, it can occur at any age, especially in high risk groups like firefighters.

**FIREFIGHTERS ARE 2 TIMES AS LIKELY TO  
DEVELOP TESTICULAR CANCER**

Testicular cancer is curable when caught early!

*Firefighters should* follow the eleven **BEST PRACTICES** for Firefighter Occupational Cancer Prevention to reduce exposures to carcinogens that can cause testicular cancer...

AND

Perform a **monthly testicular self-examination** and get an **ANNUAL physical that includes testicular examination!**

Visit our **FOCUS** facebook page to learn more about firefighter cancer
